PART VI

PUBLIC ADVERTISEMENTS

OFFICE OF THE PRINCIPAL INFORMATION OFFICER TO THE GOVERNMENT OF MYSORE, OLD PUBLIC OFFICES, BANGALORE.

Press Note.

Dated 11t April 1950.

An article has been published in the Press complaining that the electrification of Villages around Bangalore has not been taken up expeditiously.

The question of electrification of Villages in the neighbourhood of Bangalore has been engaging the attention of the department. As every one knows, the main Receiving Station of Bangalore is situated in Seshadri Road and power supply to Basavangudi and other areas on the South has been through overheard lines, which were constructed several years ago, to meet a small demand. The demand having exceeded the anticipation during the course of the last few years, the voltage conditions at the tail end of those feeders are most unsatisfactory Attempts by the department to alter these conditions and improve the supply voltages, etc., have not been at the desired rate on account of the lack of materials therefor. However, this work has been taken up during the course of 1949-50 and will be continued during 1950-51 and it is hoped to accomplish this object within the course of a year or so, as concerted effort is being made in this direction. Extension of these feeders for power supply to villages nearby will only result in worsening the voltage conditions to consumers who are already at the tail end of these feeders without any adequate satisfactory power supply to the villages themselves.

Estimates have been prepared for the electrification of these Villages and such of those which could be serviced without seriously affecting the supply voltages to the existing consumers are being sanctioned by Government and are being executed. Further extension to other villages are being examined from time to time and will be taken up when voltage conditions permit. Thus it will be seen that the failure to extend electricity to the neighbouring villages is not due to any other cause but the unsatisfactory voltage conditions existing at the tail-end of long feeders from the receiving station in Bangalore.

It has to be further stated that with the completion of the new Receiving Station in the Industrial suburb and extension of lines therefrom, it will be possible for the department to extend electricity to the villages. This work is on hand and is expected to be completed within the course of a year.
